INDEX TO VOLUME 287

January–June 1969

SUBJECT INDEX

Papers are listed under subject headings with authors' names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

OL.
287
969

B

Beam. On frequencies of elastic beams with random imperfections (Bliven & Soong), 297
On the response of beams to an arbitrary number of concentrated moving masses (Stanišić & Hardin), 115
Orthonormal aspect on vibration modes for a class of nonuniform beams (Wang), (BC), 175

Book Reviews
Alexander, G. (edited by): High energy physics and nuclear structure, 81
Ames, W. F. (edited by): Nonlinear partial differential equations, 274
Ames, W. F.: Nonlinear partial differential equations in engineering, 528
Anderson, Robert B. (edited by): Experimental methods in catalytic research, 439
Barnes, C. D. and C. Kircher: Readings in neurophysiology, 80
Brown, Earle B.: Modern optics, 529
Bunge, Mario: Scientific research I: The search for system, 79
Chirlian, Paul M.: Integrated and active network analysis and synthesis, 187
Chretien, M. and S. Deser (edited by): Axiomatic field theory, Vol. I, 276
Critescu, N.: Dynamic plasticity, 86
Davies, D. W.: The theory of the electric and magnetic properties of molecules, 277
Dienes, G. J. (edited by): Studies in radiation effects on solids, 189
Dietz, A. G. H. and F. R. Eirich (edited by): High speed testing, Vol. V, 531
Donovan, B.: International encyclopedia of physical chemistry and chemical physics: Elementary theory of metals, 185
Ebert, M. and A. Howard (edited by): Current topics in radiation research, 190
Eringen, A. C.: Mechanics of continua, 270
Farley, F. J. M. (edited by): Progress in nuclear techniques and instrumentation, Vol. III, 82
Frankl, Daniel R.: Electrical properties of semiconductor surfaces, 86
Greenaway, David L. and Gunther Harbecke: Optical properties and band structure of semiconductors, 356
Grove, A. S.: Physics and technology of semiconductor devices, 186

Book Reviews (*Continued*)
Gruverman, Irwin J. (edited by): Mössbauer effect methodology, Vol. 3, 273
Gupta, Someshewar C.: Transform and state variable methods in linear systems, 87
Haugen, E. B.: Probabilistic approaches to design, 269
Hossaien, A., H. Ar-Rashid and M. Islam (edited by): Nuclear structure, 527
Jonassen, Hans B. and Arnold Weissberger (edited by): Technique of inorganic chemistry, Vol. 7, 272
Lewis, II, P. M. and C. L. Coates: Threshold logic, 271
Levine, Sumner N. (edited by): Advances in biomedical engineering and medical physics, Vol. I, 271
Lin, T. H.: Theory of inelastic structures, 354
Mackay, R. Stuart: Bio-medical telemetry, 188
Malina, Frank J. (edited by): Life science research and lunar medicine: Proc. Sec. Lunar International Lab. (LIL) Symp., 353
Mangulis, Visvaldis: Handbook of series for scientists and engineers, 530
Martin, D. H. (edited by): Spectroscopic techniques for far infrared, submillimeter and millimeter waves, 186
Meeron, E. (edited by): Physics of many-particle systems. Vol. I: Methods and problems, 443
Mesarovic, M. D. (edited by): Systems theory and biology, 268
Newkirk, J. B. (edited by): Advances in X-ray analysis, Vol. XI, 444
Olsen, T. A. and F. J. Burgess (edited by): Pollution and marine ecology, 267
Ordway, III, Frederick I. (edited by): Advances in space science and technology, Vol. 9, 269
Ozisik, M. Necati: Boundary value problems of heat conduction, 440
Patai, Saul (edited by): The chemistry of the amino group, 84
Peterlin, A. *et al.* (edited by): Macromolecular reviews, 443
Poole, Jr., Charles P.: Electron-spin resonance, 185
Rado, George T. and Harry Suhl (edited by): Magnetism, Vol. II B, 268

Book Reviews (Continued)
Rawer, K. (edited by): Winds and turbulence in stratosphere, mesosphere and ionosphere, 355
Rylander, P. N.: Catalytic hydrogenation over platinum metals, 80
Schecter, George (edited by): Information retrieval—a critical view, 445
Schneck, Jr., Hilbert: Theories of engineering experimentation, 356
Singer, Thomas P. (edited by): Biological oxidations, 354
Smart, W. M.: Stellar kinematics, 440
Waksman, S. A. (edited by): Actinomycin: nature, formation and activities, 82
Weissenberg, A. O.: Muons, 83
Weyl, W. A. and E. C. Marboe: The constitution of glasses, Vol. 2, Part 2, 528
Wiberg, Kenneth B. (edited by): Oxidation in organic chemistry, Part A, 528
Boundary layer. Numerical solution of field problems in embounded domains (Axelrod, Wallach & Erlicki), 457

C

Communication nets. Estimation of terminal capacity in probabilistic communication nets (Traiger & Frank), 37
Coronal exosphere. The electric field in the solar coronal exosphere and the solar wind (Sen), 451
Cyclical functions. Cyclical functions and permutation matrices (Pipes), 285

D

Driving point functions. Positive real derivatives of driving point functions (Krueger & Brown), 51
Dynamic symmetry. New rectangles for dynamic symmetry (Moon), 19
Dynamic systems. A method for stability investigation of a periodic dynamic system with many degrees of freedom (Nishikawa & Willems), 143

E

Elastic beams. On frequencies of elastic beams with random imperfections (Bliven & Soong), 297
Elasticity. Fourier transform methods in elasticity problems and an application (Amba-Rao), 241
Elastic–viscous fluid. On decay of motion of an elastic–viscous fluid in a spherical vessel and a circular cylinder (Gulati), (BC), 73
Electrical networks. Analysis and design of the communication networks with memory (Hakimi), 1
Estimation of terminal capacity in probabilistic communication nets (Traiger & Frank), 37
Electric field theory. The electric field in the solar coronal exosphere and the solar wind (Sen), 451
Electrodynamics. Dressed stationary states in quantum electrodynamics (Rosen), (BC), 261
Electrodynamic theory. The law of electrodynamics (Aspden), (BC), 179
Electromagnetic waves. Propagation of an electromagnetic wave in an infinite rectangular dielectric wave guide (Bartling), 389
Electron emission functions. Values of the electron emission functions $v(y)$, $t(y)$ and $\Theta(y)$; for $y \geq 1$ (Craig Miller), (BC), 347
Equations of state. Relationships between incomplete equations of state (Cowperthwaite), 379
Excitations. Dynamic response of systems subject to moving mass excitations (Skeer & Hribar), 319

F

Field problems. Numerical solution of field problems in embounded domains (Axelrod, Wallach, & Erlicki), 457
Flow measurement. On decay of motion of an elastico–viscous fluid in a spherical vessel and a circular cylinder (Gulati), (BC), 73
On the design of quadratic weirs (Murthy), 159
Flow theory. Flow variation in multiple min-cut calculations (Frisch), 61
Fluid flow. On decay of motion of an elastico–viscous fluid in a spherical vessel and a circular cylinder (Gulati), (BC), 73

G

Graph theory. An algorithm for straight-line representation of simple planar graphs (Woo), 197

H

Heat surface physics. The solid angle at a point subtended by a circle (Rothe), 515
Helical arcs. Construction of helical arcs on an elliptic cylinder tangent to two skew lines (Bisshopp), 333
Hydraulic engineering. On the design of quadratic weirs (Murthy), 159

L

Linear systems. Optimum linear multivariable systems with randomly sampled signals, (Loo), 471

VOL.
287
1969

Loading. The ramp unloading case of transient axially–symmetric excitation of a circular elastic rod in plane strain (Nelson), 125

Lumped-distributed systems. Stability of a class of lumped-distributed systems (Bourquin & Trick), 363

M

Mechanics. Construction of helical arcs on an elliptic cylinder tangent to two skew lines (Bisshopp), 333

Memory code. Analysis and design of the communication networks with memory (Hakimi), 1

Min-cut calculations. Flow variation in multiple min-cut calculations (Frisch), 61

Moving masses. Dynamic response of systems subject to moving mass excitations (Skeer & Hribar), 319

On the response of beams to an arbitrary number of concentrated moving masses (Stanišić & Hardin), 115

Multisandwich shells. Large deflections of multisandwich shells of arbitrary shape (Schmidt), 423

N

Network theory. An algorithm for straight-line representation of simple planar graphs (Woo), 197

Analysis and design of the communication networks with memory (Hakimi), 1

Positive real derivatives of driving point functions (Krueger & Brown), 51

Repeated transformations to solve non-uniform transmission line problems (Bhattacharyya & Swamy), 251

P

Partial differential equations. Solution of some partial differential equations using state space techniques (Dodd & Gupta), 305

Performance index. A study of weighting factors of the quadratic performance index (Wakeland), 101

Permutation matrices. Cyclical functions and permutation matrices (Pipes), 285

Phase plane. Evaluation of phase-plane derivatives at singular points (Denman & Anderson), (BC), 523

Planar graphs. An algorithm for straight-line representation of simple planar graphs (Woo), 197

Plane strain. The ramp unloading case of transient axially-symmetric excitation of a circular elastic rod in plane strain (Nelson), 125

Probability. Estimation of terminal capacity in probabilistic communication nets (Traiger & Frank), 37

Q

Quantum electrodynamics. Dressed stationary states in quantum electrodynamics (Rosen), (BC), 261

R

Radiation escape. The solid angle at a point subtended by a circle (Rothe), 515

Random walk. Systems containing random parameters with small correlation times (Leibowitz), 223

S

Sampling systems. Performance sensitivity of sampling systems—a unified approach (Koivo), 209

Sensitivity. Performance sensitivity of sampling systems—a unified approach (Koivo), 209

Shell theory. Large deflections of multisandwich shells of arbitrary shape (Schmidt), 423

Signals. Optimum linear multivariable systems with randomly sampled signals (Loo), 471

Solar physics. The electric field in the solar coronal exosphere and the solar wind (Sen), 451

Stability. A method for stability investigation of a periodic dynamic system with many degrees of freedom (Nishikawa & Willems), 143

State equations. Relationships between incomplete equations of state (Cowperthwaite), 379

State space techniques. Solution of some partial differential equations using state space techniques (Dodd and Gupta), 305

Steady state theory. Dressed stationary states in quantum electrodynamics (Rosen), (BC), 261

Stress–strain. The ramp unloading case of transient axially-symmetric excitation of a circular elastic rod in plane strain (Nelson), 125

Symmetry. New rectangles for dynamic symmetry (Moon), 19

Systems analysis. A method for stability investigation of a periodic dynamic system with many degrees of freedom (Nishikawa & Willems), 143

Dynamic response of systems subject to mass excitations (Skeer & Hribar), 319

Machine computation of saturation parameters in a multilevel Zeeman system (Saxena & Narasimhan), 483

Optimum linear multivariable systems with randomly sampled signals (Loo), 471
Performance sensitivity of sampling systems—a unified approach (Koivo), 209
Stability of a class of lumped-distributed systems (Bourquin & Trick), 363
Systems containing random parameters with small correlation times (Leibowitz), 223

T

Temperature. Machine computation of saturation parameters in a multilevel Zeeman system (Saxena & Narasimhan), 483
Time study. Time-dependent transport process (Wang), 409
Transformations. Repeated transformations to solve nonuniform transmission line problems (Bhattacharyya & Swamy), 251
Transmission lines. Repeated transformations to solve nonuniform transmission line problems (Bhattacharyya & Swamy), 251
Transport process. Time-dependent transport process (Wang), 409

V

Vibration. Orthonormal aspect on vibration modes for a class of nonuniform beams (Wang), (BC), 175

W

Wave propagation. Propagation of an electromagnetic wave in an infinite rectangular dielectric wave guide (Bartling), 389
Weighting factors. A study of weighting factors of the quadratic performance index (Wakeland), 101
Weirs. On the design of quadratic weirs (Murthy), 159

Z

Zeeman systems. Machine computation of saturation parameters in a multilevel Zeeman system (Saxena and Narasimhan), 483

VOL.
287
1969

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced.
